Professionally-designed templates with web-editor

Thousands of professionally-designed templates accessible via a standard web-browser. Completely customize all images and text via an easy-to-use, drag-and-drop editor. The robust, click-and-change web-editor enables effects such as image animations, text shadows, layer transparency, rotations, background effects and more.

Day-parting & Scheduling

The cloud software provides an intuitive interface to setup day-part playback of templates. Setup weekly, monthly and custom post-dated schedules via advanced scheduling options. Day-parting allows for showing breakfast, lunch and dinner menus on the same screen via an automated scheduling system.

Model	Andros signage system
Operate via	Cloud-based management via a browser
Construction	Metal casing and ease-of-use ports
Dimensions	5 in x 3 in x 0.7 in
Processor	System-on-a-chip | Quad-core ARM A9
